

Environmental Health

Health Indicator	Litter
1 Average per capita water consumption	7.7

No	Indicator	Percent
1	Onsite (temporary) solid waste storage means available	6.9
2	Availability of improved solid waste disposal methods	0.0
3	Households with access to a latrine facility	36.4
4	Availability of a hand washing facility near latrines from those households that have latrines	8.3
5	Hand-washing practice in the population after defecation	5.2
6	Access to improved water supply	67.5
7	Availability of bathroom in households	1.7
8	Improved management of waste water	6.3
9	Hand washing practice before handling food	0.7
10	Water treatment practice at household level for those who fetch from unimproved sources	10.3
11	Observed water storage containers covering practice	81.1
12	Practice of pouring for transferring water from storage containers	76
13	Two weeks prevalence of diarrhea in households	9.3
14	Insects complaint	73.5
15	Perceived prevalence of common house flies infestation	94.1
16	Perceived prevalence of fleas infestation	78.7
17	Perceived prevalence of mosquitoes infestation	41.7
18	Perceived prevalence of lice infestation	39.8
19	Perceived prevalence of bedbugs infestation	21.9
20	Prevalence of rat infestation	73.5
21	Knowledge on the role of mosquito in disease transmission	97.1
22	Knowledge of the role of common house flies in disease transmission	44.0
23	Knowledge on the role of fleas in disease transmission	12.5
24	Knowledge on the role of lice in disease transmission	15.0
